

## 2009 International Conference on Mobile Communications and Pervasive Computing (MCPC 2009)

Leipzig, Germany, 23-25 March 2009

<http://siwn.org.uk/2009leipzig/MCPC09.htm>

Mobile communications have remained one of the most vibrant and stimulating areas driving forward the Information and Communications Technology. Quite clear is appearing the tomorrow's picture of networks and communications, that is, convergence of diversified networks, integration of IP based core network and flexible robust wireless access, self-organization and self-management, on-demand service-oriented architectures, to just mention a few striking characteristics.

Pervasive computing is emerging as the next paradigm for distributed and mobile computing through building systems of communicating miniaturized devices, sensors and actuators in which ambient, personalized trustworthy services built out of pervasive infrastructure and information are seamlessly available anywhere, anytime, and in all forms. By embedding ambient intelligence in everyday objects, our workplaces, our homes and even ourselves, pervasive computing and communications will enable a new breed of applications and systems which are composed of massive smart objects to create the environments that underpin a smart world.

MCPC 2009 provides a premier forum for researchers and engineers alike to present state-of-the-art research and development progresses in all areas related to architecture, design, implementation, application and evaluation of mobile communications and pervasive computing as these technologies are permeating and integrating into our everyday living and working environments.

### Important Dates (New)

05 January 2009 Submission of manuscripts  
31 January 2009 Notification of acceptance  
15 February 2009 Camera-Ready Version  
23-25 March 2009 Conferences

### Submission and Publication

Submissions must be original contributions that neither have been published nor have been under review for publication elsewhere. All submissions must be in English and no more than 7 pages in the format specified in the Instructions for Authors, which are available on <http://siwn.org.uk/press/ita.htm>. To submit a paper, a file in pdf format containing the manuscript of submission must be uploaded to the MCPC 2009

submission website.

All manuscripts submitted will be sent to 3-4 members of the International Technical Program Committees of the Conferences for peer reviews and assessed according to the technical merits and presentation, on which the acceptance decision will be based.

Accepted papers will be included in the CD-ROM Proceedings of SIWN 2009, which will be available for participants at the Conferences to promote the widest exchange and dissemination at the Conferences.

All accepted papers of the conference are invited to publish their revised versions in the international journal <<Communications of SIWN>> (CoSIWN) (ISSN 1757-4439) after the conference. Details can be seen on the SIWN 2009 website.

Proposals of workshops, invited sessions and tutorials on emerging areas are welcome. Please discuss your proposals with the Technical Program Chair.

### Topics of Interest

Topics of particular interest include (but not limited to) the followings.

- (1) Mobile Communications
- (2) Wireless Networks
- (3) Autonomic Networks and Communications
- (4) Pervasive Computing and Communications
- (5) Pervasive Infrastructures and Services
- (6) Pervasive Applications

### Online Submission Website

### Technical Program Chair

Dr Jaafar Gaber  
Université de Technologie de Belfort-Montbéliard  
France  
[Jaafar.Gaber@utbm.fr](mailto:Jaafar.Gaber@utbm.fr)

### Publicity Chair

Dr Jemal Abbawajy  
School of Engineering and Information Technology  
Deakin University, Australia  
[jemal@deakin.edu.au](mailto:jemal@deakin.edu.au)
